Reason for Exam/Comment: DOE

PA CHEST, 0410 HRS:

There are no prior studies available for comparison. The heart size is within normal limits. The lungs are slightly hyperinflated. There is no evidence of infiltrate. There are no interstitial markings suggestive of edema. The bony anatomy appears normal.

IMPRESSION: Normal study.
Dictating Radiologist: Harold L. Desai Jr., M.D.

AU

ELECTROCARDIOGRAM REPORT

- RHYTHM: NORMAL SINUS WITH OCCASIONAL VENTRICULAR PREMATURE BEATS (2/min.)

RATE: 80

PR: .12

QRS: .07

QT: .36

AXIS: +75

NOTE: Suspect incorrect lead placement of V3. Interpretation ignores V3 tracing.

INTERPRETATION: Normal sinus rhythm. Significant left ventricular hypertrophy. Steep T waves in V4 through V6 may be reflective of hypertrophy or hyperkalemia. Small Q waves in inferior and lateral leads: may represent old infarction. Clinical correlation and prior EKG are required for full interpretation. No other old or new abnormalities noted.
